

THE LOOP 1200 X 2400 PALLET

1200mm X 2400mm **2WE**

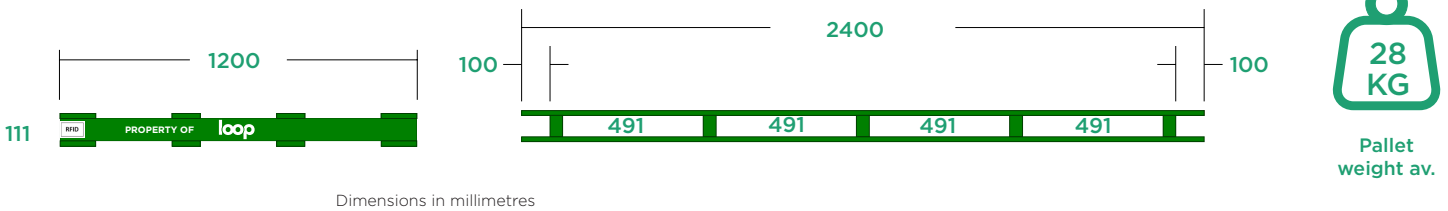

DESCRIPTION

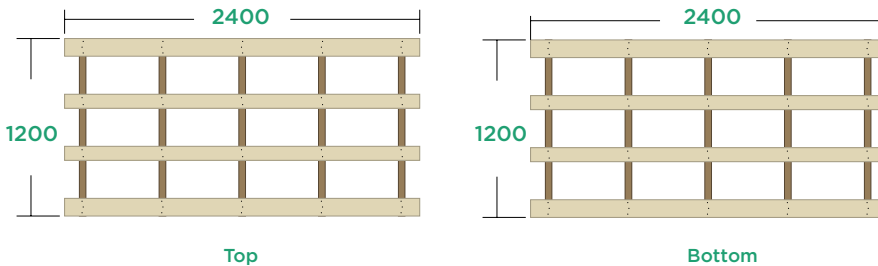

Different by design, our pool of reusable green pallets are recovered, repaired and reintroduced into the buildings material supply chain, multiple times, reducing avoidable timber waste. Designed for reuse LOOP pallets have been engineered for safety, reliability and sustainability.

APPLICATIONS & USE

Our 1200 X 2400 pallets are a robust solution for transporting wallboards and other sheet materials, and are suitable for use with all commonly used equipment, on automated production lines, and in warehousing facilities.

LOOP recommends the following maximum safe working loads as verified by PDS

FEATURES & BENEFITS OF LOOP PALLETS

Stronger

Our pallets are stronger than most single use pallets, making them easier and safer to handle, load and stack

Less waste

Our sustainable circular economy model promotes reuse, driving improved operational efficiencies

Different by design

Pallets manufactured for multiple use and with durability in mind reducing product damage and increased load stability

Resilient infrastructure

Underpinned by our alignment with Scott Pallets and BSW Timber as a member of the BSW Group

All pallets are manufactured in UK. The Pallet LOOP source 100% of their pallets as FSC® certified.

Consistent specification

Engineered the same way, our pallets can help increase operational productivity

Traceable

Pallets are armed with RFID tracking for maximum traceability and SMART data applications

Distinctive

LOOP pallets, painted with green water-based and EEC & FDA approved paint are easily identifiable to help drive returns.
